NEXT-LEVEL TECHNOLOGY FOR A CONFIDENT AND ENERGISING DRIVE

Nissan Intelligent Mobility is redefining the way we power, drive and integrate cars in the world around us. It's bringing you and your X-TRAIL closer together for a more confident, more exhilarating ride. It's making your journey more personal through advanced connectivity and empowering you through progressive technologies. It's enhancing the joy of being behind the wheel and turning the world into a safer place everyday.
BREATHTAKING FROM TOP TO BOTTOM

Want to share an inspiring view on a starry night? Need a cozy refuge on a chilly morning? X-TRAIL makes sure you're well taken care of.

To design their zero-gravity-inspired seats with spinal support, Nissan's engineers looked to the cosmos. They recreated the relaxed posture of astronauts floating in space by designing an articulated front seat that supports you from the pelvis to the chest optimizing the blood flow, and seat cushions that provide better pressure distribution. The result is exceptional comfort and less fatigue on the long distance trips of your adventures.

More inspiration comes from the available Power Panoramic Sunroof, offering everyone aboard the most stunning theatre view of the sky and stars.

GET A HAND WHEN YOU WANT IT

STEPPING IN WHEN YOU NEED IT

Meet your co-driver. It sees, it senses, it jumps in. From smart safety features that step in on your behalf to fully autonomous driving aids, from Intelligent Park Assist to Intelligent Emergency Braking with Pedestrian Recognition, Nissan X-TRAIL acts as your Nº1 partner, always looking out for you, always there to support you, and never forgetting about those around you.

INTELLIGENT EMERGENCY BRAKING
WITH PEDESTRIAN RECOGNITION.
Continuously monitors the presence of vehicles and pedestrians ahead and warns you if you need to slow down. It will even apply the brakes and bring you to a stop to help avoid a collision.

LANE DEPARTURE WARNING.
This system will alert you of drifting by giving audible and visible warnings.

HIGH BEAM ASSIST.
See more on dark roads. This system will activate the beams as soon as you need them and temporarily dip the lights for oncoming traffic.
Nissan's Intelligent Driving Systems use advanced radar technology to constantly monitor all the activity around you, keeping tabs on the traffic and helping you handle any unexpected situations. It’s like having an extra pair of eyes keeping watch so that you can make the most of your family adventure.

**REAR CROSS TRAFFIC ALERT.** This system will warn you if there is any oncoming traffic or large objects behind you when you’re reversing.

**TRAFFIC SIGN RECOGNITION.** Stick to the latest speed limits thanks to automatic road sign detection as you go.

**BLIND SPOT WARNING.** This system can see what the eye cannot. It will warn you if it detects any vehicles in your rear diagonal blind spot.
X-Trail includes two important Nissan technologies to help keep you and your family safe on the road. Intelligent Cruise Control adjusts your speed to match the road conditions ahead, while Lane Keep Assist steers the car if you drift over the line. Relax, stay focused: we've got your back.

**INTELLIGENT CRUISE CONTROL.** Adjusts your car speed to maintain safe distance according to the flow of traffic.

**LANE KEEP ASSIST.** Helps to keep the vehicle centered during single lane driving, even on slight curves. Steering Assist will provide small steering inputs to help the driver center the vehicle in the lane.
INTELLIGENT RIDE CONTROL.
Take the rough with the smooth. This system applies subtle braking to prevent turbulence over bumps and enhances the overall ride comfort for the whole family.

INTELLIGENT TRACE CONTROL.
Keep cool when cornering. This system adjusts brake pressure on individual wheels to keep you on an optimal line through turns.

INTELLIGENT ENGINE BRAKE.
Feel the curve. This system controls the CVT as though you’re driving manual through a light bend. It shifts down to smoothly decelerate on your way through the curve, then shifts back up to accelerate on your way out.

The X-TRAIL is so agile and responsive, it actually improves your driving. Nissan’s Chassis Control technologies make it smooth to handle and supple yet secure to drive – ensuring an exciting yet comfortable journey for everyone on board. So pile in and have fun.
DRIVE MORE LIKE A PRO
ADAPT TO RAIN OR SLEET IN THE BLINK OF AN EYE

The X-TRAIL can adapt to changing conditions 30 times faster than the blink of an eye. Whether it’s snow, rain-covered pavement or a tight turn, the system will automatically send power to the wheels that need it the most. Even in ideal conditions, the X-TRAIL’s Intelligent 4x4 system pays big dividends: getting a grip has never felt better.

STAND STILL ASSIST/AUTO HOLD: No rolling backwards. With Stand Still Assist, the feature will hold your X-Trail at a stationary position for up to 3 minutes, at which point the electric parking brake will be applied if there is no driver interaction. The feature works on all gradients. Only available on manual transmissions.

INTELLIGENT 4X4: with X-TRAIL’s All-Mode 4x4-i, is a system that’s capable on-road and off. You can choose full-time 2WD for maximum efficiency. Auto Mode constantly monitors conditions and adjusts the balance of power between front and rear.
Looking for excellent fuel economy in a roomy SUV that’s lots of fun to drive? That’s what you get with X-TRAIL. From exterior aerodynamics that whisper through the wind to advanced engines transmissions including the virtually gearless XTRONIC and dual clutch DCT transmissions, it takes efficiency and performance to the next level.

Powering the X-TRAIL are Nissan’s advanced 1.7 litre diesel and 1.3 litre Petrol engines, providing enhanced fuel economy, lower CO₂ emissions and excellent performance. These engines feature Nissan’s automatic Start/Stop technology, which automatically shuts down the engine when temporarily not in use - to save fuel, then smoothly and quickly restarts as you pull away. Nissan engines also provide up to 2000kg towing capacity for your X-Trail.

In the latest version of XTRONIC (Continuously Variable Transmission), friction is reduced up to 40% and the ratio coverage is increased greater than that of some 8-speed automatics. An Eco mode improves fuel economy at the touch of a switch. Combined with such smooth performance, it’s like riding a continuous wave of power.

For engine performance data such as CO₂ emission and fuel consumption, please refer to model technical data sheet available online and at your local dealership.
